

# Spacial Thalassa ClimaSys

Enclosures, accessories, thermal management  
and software systems

# Schneider Electric

Our Universal Enclosures ranges, solutions for each application

PB500006

## > Spacial Metal enclosures and boxes

From our small boxes to large suitable floor-standing enclosures, with the Spacial range you can find the perfect fit for your applications. Our extensive range of easy-to-use accessories helps you save time during your projects.

Select between steel or stainless steel to better suit the installation environment. In our stainless-steel offer you can find the optimal solution where cleanliness is required, or for highly corrosive environments.

PB500006

## > Thalassa Insulating enclosures

Working in difficult environments can, without the right protection, expose your installation to chemical or aggressive substances. Developed to efficiently protect it; our Thalassa offer, from boxes to floor-standing enclosures, made in fibreglass-reinforced polyester, resists in hard conditions and outdoor applications.

Our Thalassa industrial boxes in ABS or polycarbonate are strong, easy to install and designed to be used in highly demanding environments.

New

### Early 2016, the Thalassa polyester enclosure range changes color

#### > What products will be affected?

All our Thalassa range of polyester enclosures.

#### > What happen with the part numbers (references)?

Every product that have changed in colour have also changed the part number. It is done just adding a letter "G" at the end on reference. *Example:*

| RAL 7032 | RAL 7035  |
|----------|-----------|
| NSYPLM43 | NSYPLM43G |

#### > How can I obtain RAL 7032 enclosures?

Consult us.

PB50296-21

PB502812-30

## > ClimaSys Thermal management

Preserving and keeping the right temperature inside your enclosure is vital for maximising the lifetime of your installed devices. With our ClimaSys offer you can find the right solution, be it Ventilation, Cooling or Heating, including control units for temperature, humidity and much more.

# Industry and Infrastructure Offer

## A material for every environment

PB500013-55

### > Solution:

The Spacial range in steel (wall-mounting, monobloc and suitable floor-standing enclosures).

### > Steel

#### Indoor non-clean industrial environment

The industrial environment in mechanical plants is especially demanding as regards the protection of electric and electronic components against dust, splashing with oil and impacts. This environment therefore requires a range that is suited to the applications and easy to implement.

- **Standard range**, for industry.
- **E.M.C. range**, against electromagnetic disturbances (treated with Aluzinc).
- **Range of ATEX enclosures**, for potentially explosive atmospheres.

PB500014-55

### > Solution:

The Spacial range in stainless steel (wall-mounting, monobloc and suitable floor-standing enclosures).

### > 304L - 316L stainless steel

#### Demanding industrial environment

Food and beverage, pharmaceutical, petrochemical and infrastructure industries are particularly demanding in terms of hygiene and resistance to corrosion. With two grades of stainless steel:

- **304L stainless steel:**  
Resistance to corrosion and cleanability (often used in food production environments).
- **316L stainless steel, also known as "marine stainless steel":**  
Very high resistance to corrosion (saline or chlorinated environment).
- **Range of ATEX enclosures**, for potentially explosive atmospheres.

PB500015-28

PB500016-48

### > Solution:

The Thalassa range (boxes, wall-mounting and floor-standing enclosures).

### > Insulating polyester and plastic materials (ABS, polycarbonate)

#### Infrastructures and industrial environments

Outdoor infrastructures and electrical installations are exposed to direct sunlight, rain, saline mist, extreme temperatures, oil splashes, chemical and corrosive agents.

- **Standard range**, for industry and infrastructures.
- **Range of ATEX enclosures**, for potentially explosive atmospheres.

PB5002732-46

PB5002733-26

### > Solution:

The Thalassa PHD and Spacial S3HD and SFHD ranges (wall-mounting and floor-standing).

### > Heavy Duty materials New

#### Severe outdoor environments, generally requested by OEMs, telecom, water treatment and transportation

- Polyester Heavy Duty is suitable for outdoor public areas thanks to its multiple virtues:
  - pressure and shock resistant (IEC 61439-5: 2010),
  - anti-posting thanks to its special ribbed-surface door,
  - insulated (ready to be Class II according to IEC 61439-1: 2011).
- Steel Heavy Duty enclosures are designed for outdoor private areas:
  - they are engineered to resist aggressive environments (anti-corrosion certification class C4H, ISO 12944:1999).

# Selection tools

PE500009-185

## > [www.schneider-electric.com](http://www.schneider-electric.com)

Our web site allows you to access all the Schneider Electric products in just two clicks with direct links to:

- A complete library of technical documents, catalogues, FAQs brochures, etc.
- Certificates.
- 2D & 3D drawings.
- Selection Guides from the e-catalogue.
- Product discovery sites.

You may also find illustrated overviews, news to which you can subscribe, a list of country contacts and more useful information.

## Our software suite

60120-24

### > [Spatial.pro](#)

#### Find the right dimension for your enclosure

Spatial.pro allows you to make control panel quotations based on dimensions of electrical devices. A full project with several sets of control panels is quoted in minutes, with automatic creation of the Bill of Material and 2D drawings for front/side views.

### > [Digital Rules](#)

#### Find the accessories that suit your enclosure

The digital rules allow you to select the best components from the current product range. There will be no risk of mistake, since product and accessory selection take place automatically, saving you time and money.

PE500011-38

### > [ProClima](#)

#### Find the best thermal solution for your enclosure

Select and calculate your thermal management requirements, according to the environment and the electrical/electronic devices installed inside the enclosure.

DB300837-21

### > [Spatial.conf](#) New

#### Get your enclosure pre-engineered for your special needs

Spatial.conf software gives you total autonomy to configure and quote enclosures with services (cut-outs, painting, accessory mounting) in less than 3 minutes. Spatial.conf is designed for convenient, error-free, and time-saving orders.

Have a smartphone or a tablet? Scan this >

# The customised solutions

Over **50 years** of experience, knowledge and expertise to have the best enclosure solution that meets your needs.

## Two offer levels to cover your different requirements

### Configured: the enriched standard offer

Feasibility automatically guaranteed by the configurator software Spacial.conf, which gives you autonomy and flexibility to quickly define your customized enclosure.

 Committed delivery date.

### Specific: the co-developed offer

Special dimensions, accessories and logistic needs. You participate to the whole development process of your "Tailor-made" solution.

 According to co-developed specifications.

|                        | Steel | Stainless steel | Insulating material |
|------------------------|-------|-----------------|---------------------|

● Configured offers
○ Specific offers

### Time saving

Delivered with cut-outs & painting: no waste of time

### Logistics

- Flexible management of your logistic option (scheduled delivery service for on-going orders)
- Special packaging

### Installation simplified

Enclosures delivered with cut-outs: you don't need special tools

### Ergonomic design

Customized project dedicate to your personal concern

PE500518-1B2

### Life time increased

- Cut-outs done before painting guarantees better anti-corrosion/sealing
- Painting service for better protection

### Quality improved

- No burrs on edges of cut-outs
- Guaranteed machining tolerances

### Aesthetics

- Large choice of colours
- External surfaces with no scratches

### Higher performances

- Adapted thermal management
- Upgraded stainless steel type

#### Wall-mounting

- S3D Wall-mounting steel p. 50
  - S3D 19" enclosures p. 367
  - S3DB Terminal enclosures p. 328
  - S3DBFL Terminal enclosures with FL21 cut-out p. 328
  - S3DM Distribution modular enclosures p. 326
  - VDM 19" enclosures p. 364
  - S3DEX Potentially explosive atmospheres p. 400
  - S3HF Electromagnetic compatibility p. 390
  - S3D 6G, S3D 6G K3 Seismic and nuclear enclosures p. 346

**Characteristics**

- From 300 x 200 x 150 to 1400 x 1000 x 300 mm
- Up to IP66
- Up to IK10

New

- S3X Wall-mounting p. 122
  - S3XEX Potentially explosive atmospheres p. 400

**Characteristics**

- From 300 x 200 x 150 to 1400 x 1000 x 300 mm
- Up to IP66
- Up to IK10

#### Floor-standing

- SM Floor-standing compact p. 80

  - Automobile application p. 448
  - SFP Prisma application p. 304
  - SFHF Electromagnetic compatibility p. 391
  - SF 5G, SFP 5G Seismic and nuclear enclosures p. 346

**Characteristics**

- From 1200 x 600 x 300 to 2200 x 1600 x 800 mm
- IP55
- Up to IK10

New

- SMX Floor-standing monobloc p. 132
- SFX Floor-standing suitable p. 132

**Characteristics**

- From 1200 x 600 x 300 to 2200 x 1600 x 800 mm
- IP66
- Up to IK10

#### Outdoor

- S3HD Wall-mounting Heavy Duty enclosures p. 332
- SFHD Floor-standing Heavy Duty enclosures p. 332

Spacial S3HD and SFHD are engineered to resist aggressive environments (anti-corrosion certification class C4 H, ISO 12.944).

**Options**

Ventilated plinths, roof ventilation module, slim fanbox, Heavy Duty fixings.

**Why should I choose it?**

Designed to resist in outdoor private areas.

**Characteristics**

- From 300 x 200 x 180 to 2000 x 800 x 630 mm
- Up to IP66
- IK10

+ Order **NSYCRNGSDR** for double mounting of the mounting plates.

(4) Order nuts ref. **NSYAMCSF**. Steel siderail ref. **NSYMDVR12**.

(5) When width  $\geq 1000$  ref. **NSYEMR** is mandatory (see on page 74).

\* Possible assembling to ref. **NSYDLM84P** or **NSYDLM112**.

\*\* Possible assembling to ref. **NSYDLM168** or **NSYDLM240**.

**Door accessories**

### Small metallic enclosures

- Enclosures fitted with sealing gasket and M4 threaded holes fitted with removable plugs for fixing the mounting plate and/or equipment in general.
  - Lock with double-bar insert operated with key (standard supply ). Fixing this key to the insert will convert it into a handle lock.
- See other lock possibilities in the insert table.
- The Spacial SDB series with hinges consists of 2 models:
    - low cover.
    - high cover.

Sheet steel  
 Protected inside and outside with textured epoxy-polyester paint  
 RAL 7035 grey  
 IP55 according to IEC 60529  
 -

# Steel safety boxes

## Characteristics

### Applications

Security and alarm systems (such as a fire alarm) that can accommodate modular plates and equipment.

| Characteristics              | Steel safety boxes                                                                                                                                                                                                                                                                                                                                                                                                                                         |

**New**

> Simplicity, ergonomics and versatility, it's all in the box.

PB502105-40

PB502112-17

### Selection

- 3 versions: flat box (SBM), FL21 entry box (SBMC) and bus box (SBMB).
- 80 mm and 120 mm depth.
- FL21 cable entries available according to the version.

PB502113-30

### Modularity

- 28 sizes available.
- Up to 42 sizes possible thanks to the optional Extension box accessory.

PB902073-20

### Ergonomics

- Cover opening and accessory mounting with **just a screwdriver**.
- Better accessibility thanks to the Extension box accessory.

PB502085-20

### Sturdy and good ingress protection

- Mechanical protection rating up to IK10.
- Ingress protection rating up to IP66.

DE300080

### Easy installation

- Direct fixing through the rear.
- Mounting with versatile external lugs.

PB502071-20

### Added value to your work

- Quality and aesthetics.

**This range can be configured according to your needs**

4 different services available:

Assemble to order

Mounting of standard accessories

Painting

Machining

| Installation                 | <p><b>Indoor installation</b><br/>Direct wall-mounting (4 x Ø 10 mm holes with sealing plugs to maintain the IP rating) or with the help of fixing lugs installed from the outside (to be ordered separately, see the specific accessory pages). Distance between fixing holes enables the installation of the box in the same locations as many existing enclosures. Marks on the rear of the box locate the fixing points of obsolete Schneider Electric models. Marks on the sides help with drilling the body to install hinges</p> <p><b>Outdoor installation</b><br/>Compliant with IEC 62208 regarding type tests specified in §9.12 (resistance to ultra-violet (UV) radiation) and §9.13 (resistance to corrosion). It is always advisable to place the box under shelter to avoid water stagnation on the upper part of the enclosure</p>                                                                   |                                                                                                                                                              |                                                                                                                |
| Maximum load                 | Loading capacity on the body: 50 kg/m <sup>2</sup>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                              |                                                                                                                |
| Other characteristics        | <p><b>Vibration constraints</b><br/>Specific construction of the Spacial SBM - Single-piece body (rectangular structure). The rear is flat without added parts - this ensures compliance with certain vibration constraints. The tests were conducted according to the marine application by "Det Norske Veritas". Boxes labelled "DNV" have undergone these tests and obtained classification "A"</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                              |                                                                                                                |

\* 3 profiles for width 800 mm.

(1) Only on Entry boxes and Bus boxes.

(2) 2 for Bus box (3 screws for width greater than 400 mm), 4 for Flat and Entry boxes (6 screws for width greater than 400 mm).

➤ The **steel enclosure** with the greatest range of available dimensions on the market!

PE500198-48

PE500310-37

### Useful life

Quality of the welding and the coating.

PE500199

### Component security

- Water and dust tightness and impact resistance.
- EMC and ATEX offer.

PE500097-13

### Increased choice

- Large range of universal dimensions.
- Application offer with special dimensions.

PE500199

### Easy maintenance

- Removable hinges.
- 1 lock command from the height of 600 mm.

PE500304-32

### Personnel safety

- Earthing studs welded to the body and door.
- 3-point lock from the height of 600 mm.

PE500306-32

### Added value to your work

Quality and aesthetics.

PE500305-29

### Easy equipping

- Four 10-mm shouldered welded studs.
- Broad range of mounting plates.
- Broad range of cable-gland plates.
- Wire guides welded to the door from the height of 400 mm.

DB300073-12

### Easy handling

- Reusable, eco-friendly packaging.
- No sharp corners.

This range can be configured according to your needs

| Installation                 | <p>Outdoor installation: compliant with IEC 62208 regarding type tests specified in §9.12 (resistance to ultra-violet (UV) radiation) and §9.13 (resistance to corrosion)</p> <p>It is always advisable to install a canopy to avoid water stagnation on the upper part of the enclosure</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Fixing                       | 4 (or 6**) M8 x 25 shouldered backstuds for installing mounting plates and step slides, leaving a space of 10 mm behind them.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Supply                       | <p><b>Body</b></p> <ul style="list-style-type: none"> <li>■ Single-piece body (cross-shaped structure). Gutter-shaped front profile with double fold. Flat rear</li> <li>■ M6 x 16 earthing screws for equipotential connection between the door and the body of the enclosure</li> <li>■ Cable-gland plate with marking for easy drilling and to guarantee the maximum access surface; delivered with the enclosure. This plate is flush with the body of the enclosure (detail and other options on page 70)</li> <li>■ Direct wall-mounting (4 Ø 10 holes for the sealing plugs guaranteeing the IP) or with the help of fixing lugs installed from the outside (to be ordered separately, see page 60)</li> </ul> <p><b>Door</b></p> <ul style="list-style-type: none"> <li>■ Wall-mounting enclosure supplied with 3-mm double-bar lock as standard</li> <li>■ Polyurethane door gasket</li> <li>■ M6 x 16 earthing screws for equipotential connection between the door and the body of the enclosure</li> <li>■ Easily removable and reversible, with 20-mm return with double thickness granting excellent rigidity, opening to 120°, equipped with 2 or 3 invisible hinges*</li> <li>■ Door opening to 180° with optional hinges (page 68)</li> <li>■ For heights from 600 mm, three locking points with linkage, with a single control point. Simple reversal of linkage. Maximum load: 50 kg/m<sup>2</sup></li> <li>■ A handle is delivered which provides 2 functions: <ul style="list-style-type: none"> <li><input type="checkbox"/> Operating key</li> <li><input type="checkbox"/> Tool for loosening the stud protection caps. This handle can be solidly attached to the locking system by means of a captive element</li> </ul> </li> <li>■ Perforated rails on the door, with drill holes with a diameter of 4.2 mm in steps of 25 mm: <ul style="list-style-type: none"> <li><input type="checkbox"/> 2 vertical rails from the height of 400 mm</li> <li><input type="checkbox"/> 2 vertical rails and 2 horizontal rails from the width of 800 mm</li> </ul> </li> </ul> |

\* From the height of 800 mm.

\*\* 6 studs for widths 1000 and 1200 (see pages 74 and 75).

+ Order **NSYCRNGSDR** for double mounting of the mounting plates.

(4) Order nuts ref. **NSYAMCSF**. Steel siderail ref. **NSYMDVR12**.

(5) When width ≥ 1000 ref. **NSYEMR** is mandatory (see on page 74).

\* Possible assembling to ref. **NSYDLM84P** or **NSYDLM112**.

\*\* Possible assembling to ref. **NSYDLM168** or **NSYDLM240**.

**Door accessories**

(4) Also available in ventilated version with cable gland for widths of 600 and 800, see page 104.

(5) Available in version 1800 mm: ref. NSYCOCNS1800.

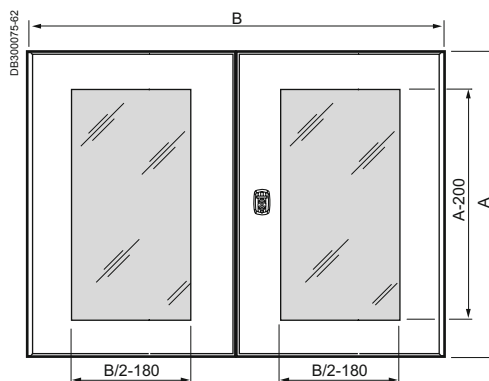

\*\*\* For the double mounting plates, order also ref. NSYSDRSDCR300 (D300) or NSYSDRSDCR400 (D400).

\*\*\*\* To install the plinth to a wall-mounting enclosure, order ref. NSYAPFWM.

### 1-door enclosure

### 2-door enclosure

- (1) A-200 from the height of 800 mm.
- (2) 4 or 6 (widths 1000 - 1200 mm) M8 x 25 mm backstuds.
- (3) 2 M6 x 17.5 mm earthing studs.
- (4) Stud centre-to-centre distance.
- (5) Centre-to-centre distance of the holes for direct fixing.

\* Except enclosure 1000 x 600 x 400 mm, J = 140 mm.  
 \*\* Cable-gland plate references: page 70.

The DXF diagrams can be downloaded from our websites.

|                    | The support pillar is fixed directly to the bottom face of the Spacial steel enclosure by means of an adapter plate. The latter, to be ordered in addition to the pillar, replaces the cable-gland plate. Overall height of the support foot: 800 mm. Mounting possible on all enclosures with dimensions up to 600 x 400 x 250 mm (except 200 x 200 x 150 and 250 x 200 x 150 enclosures). | The support bracket for Spacial S3D steel enclosures is used when the enclosure cannot be hung from a wall or a post. Suitable for outdoor use. Compatible with other enclosure ranges: <ul style="list-style-type: none"> <li>■ S3X (stainless-steel),</li> <li>■ S3HF (EMC),</li> <li>■ Thalassa (polyester).</li> </ul> Maximum enclosure dimensions: 1000 x 800 x 300 mm. Floor attachment by standard M12 fastenings. | Set of 2 feet, elevating wall-mounting enclosures. Cut-outs needed on enclosure – drilling template provided with the kit.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                 |             |       |            |         |        |               |     |     |              |      |         |              |   |      |   |   |   |   |   |   |                          |   |   |   |                           |   |   |   |                          |   |   |   |                           |

\* Enclosure with 2 cable-gland plates. - (1) Cut-out FL13 for depth 150 mm; and cut-out FL21 for other depths.  
 (2) With 2 FL21 cut-outs: ref. NSYTLG2FL; with 4 FL21 cut-outs: ref. NSYTLG4FL. - (3) NSYTLBFL with FL13 cut-out.  
 (4) NSYTLAFL cannot be mounted on enclosure width 200 and depth 150.

## Cable-gland plates

### FlexiCable cable entries

FlexiCable is an innovative cable-gland plate for simple and fast cable entrance. There is no need to drill holes: the creation of the cable entrances takes a few seconds.

- **Installation possibilities:** replaces cable-gland plate (S3D) or directly on enclosure.
- **Cable diameter:** up to 26 mm.

IP55

- Fire resistant 650°C following IEC 60695-2-11
- Tested on short-circuit effect 250 A, 25 kA following IEC 61439-1

Exists in 5 sizes matching 46 sizes (132 models) of Spacial S3D steel wall-mounting enclosures

- 1 metallic frame with pre-mounted membrane
- 1 gasket
- Hardware

### Effective cable entrance dimensions (mm)

|           |               |
|-----------|---------------|
| -         | -             |
| 178 x 63  | NSYTLCEME     |
| 278 x 63  | NSYTLDEME     |
| 378 x 63  | NSYTLLEME     |
| 478 x 63  | NSYTLFME      |
| 428 x 153 | NSYTLGME      |
| -         | 2 x NSYTLDEME |
| -         | 2 x NSYTLLEME |

Mount FlexiCable on your S3D enclosure.

Create a hole with a screw driver.

Push the cable through FlexiCable and finish-off your installation.

### FlexiCable repair kit

To fill-in unused holes.

# Steel wall-mounting enclosures

## Additional information

PB500386-34

- (1) Left mounting plate.
- (2) Right mounting plate.
- (3) Central backstud.
- (4) Bracket ref. **NSYCRNGSDR** with 2 M8 x 20 mm screws.
- (5) Step slide ref. **NSYDRSDCR300** (depth 300), **NSYDRSDCR400** (depth 400).
- (6) M8 x 20 mm screw.

### Installation of 2 mounting plates in the enclosures with width of 1000 or 1200 mm and depth of 300 or 400 mm

Step slides, page 218.

- 1** - On the 6 backstuds
- 2** - Two offset mounting plates with depthwise adjustment

PB500387-34

### Installation of Telequick mounting plates

Spacers for raising the mounting plate in the enclosures equipped with 6 studs.

#### Reference

**NSYEMR**

PB500388-54

### Acceptable loads on the mounting plates, bases and doors

| Spacial 3D wall-mounting enclosures |         |             |                 |                   | References                     |

(1) On a sheet door with a thickness of 20/10° mm: 60 kg of maximum acceptable load (please consult us).

### Areas without cut-outs

For 800, 1000 and 1200-mm widths, 2 cable-gland plates: see previous page.

Vertical cable guides from 400-mm height.  
Horizontal cable guides from 800-mm width.

Download our DXF diagrams from our websites.

PB500311-51

### EMC protection

Standard Spacial S3D enclosures are tested against electromagnetic disruptions. Since the enclosure is tested empty, it is advisable to rerun the tests with the enclosure completely equipped in its final configuration.

Earth braids to be ordered separately, see page 301.

Another solution and information on electromagnetic compatibility: Spacial S3HF enclosure, page 390.

### Attenuation curve of the Spacial S3D compared with the Spacial S3HF

PB501004-18

Frequency: 3 - 13.2 Hz  
 Amplitude: 1 mm/sec below 22 Hz  
 Frequency: 3 - 100 Hz  
 Acceleration: 0.7 g above 30 Hz

### Vibration constraints

Specific construction of the Spacial S3D - Single-piece body (cross-shaped structure). The rear is flat without added parts - this allows it to comply with certain vibration constraints.

The tests were conducted according to the "rules for ships" by "Det Norske Veritas". Enclosures labelled "DNV" have undergone these tests and obtained classification "A". Since the enclosure is tested empty, it is advisable to rerun the tests with the enclosure completely equipped in its final configuration.

PB501005-16

### ATEX compliance

The Spacial S3D enclosure (with adaptation) is certified ATEX by the LCIE. Spacial S3DEX enclosure, page 400 consult us.

### Environnemental consideration

Compliance with RoHS standard.

**SM**

> Multi-purpose **IP55 compact steel enclosure** for fast and simple solutions.

**Robust**

- Body made as a single piece with welded rear panel.
- Front part forming a rigid frame with welded corners.

**Practical**

- Door rails, which can be height-adjustable and used for fixing cables.
- The adaptation profile installed in the front of the enclosure and the universal 40-mm cross rail (1 row) in the rear provide the same fixing points as the modular enclosure.

**Protection**

- IP guaranteed by the rigidity of the enclosure, the expanded-polyurethane sealing gasket of the enclosure and the subsequent welding.
- Double-door enclosures with inner lock on the left door.

**Comfort**

- Handle with sturdy design for easily activating the locking system, allowing the installation of any shape insert and any cylindrical combination key.
- Easily interchangeable insert with one click.

**This range can be configured according to your needs**

4 different services available:

Assemble to order

Mounting of standard accessories

Painting

Machining

See page 450 for details or consult our web site [www.schneider-electric.com](http://www.schneider-electric.com)

➤ Multi-purpose **IP55 modular steel enclosure**.

**SF**

Adapts to all your needs.  
Assembled delivery for a ready-to-use solution.

**SF kit**

Adapts to customer needs.  
Delivered as kit, with up to 600 different possible configurations.

PB502414-50

### Robust

- Structure formed from a single 15/10°-mm galvanised-steel section, with a high rigidity.
- Vertical uprights screwed together with connections of full steel. Placement and screwing of the 4 vertical uprights at the corners of the top and bottom frames.
- Fixing by 8 screws, one at each corner of the enclosure.
- Capable of withstanding 1000 kg distributed in its volume.

PB500492-32

### Reliable

- The design of the profile creates a double protective barrier against the entry of water and dust when coupling two enclosures.
- The first barrier is the metal connection of the sections, and the second barrier is the EPDM gasket that guarantees the sealing.

PB502415-55

### Aesthetics

The built-in panels and handle with new design give the enclosure a new appearance.

PB502416-8

PB502417-48

### Comfort

- Handle with robust design for easily activating the locking system, allowing the installation of any shape insert and any cylindrical combination key.
- Panels with captive screws for easier assembly and dismantling.

PB502426-15

### Practical

Suspension of the rear panel using a self-centring piece to facilitate screwing.

PB502418-20

### Simple

The new design allows enclosures to be coupled in any direction, adapting to all installation surfaces.

PB502419-12

### Accessible

The symmetric design of the profile allows doors to be installed on any side of the enclosure, opening to right or left, providing full accessibility to the enclosure.

PB502424-16

PB502425-40

### Fast

- The double system of cut-outs on the structure allows most accessories to be installed using self-tapping TORX T30 M6 screws or nuts.
- Clip-on quick-fixing cross rails, fixed with self-tapping screws.
- Door installation inserting the captive pins of the hinge in their housing in the door.

| Set of 2 side panels fixed to the outside of the enclosure by clipping locks. No sealing gasket. | Rear panel fixed from the inside of the enclosure, preventing unauthorized personnel from accessing and removing it. Normally used in public spaces. | Partition panel for direct fixing to the structure, guarantees a water/dustproof protection of IP10 between enclosure suites. |

### Floor

#### Plinth in kit form

##### Front and rear kit

##### Side panels

##### Complete plinth

Plinth height 100 mm

Plinth height 200 mm

The complete plinth consists of two elements, one is the front and rear kit, determined by the length of the enclosure, and the other consists of the side panels, which determine the depth of the enclosure. The number of side panels required is decided according to the desired plinth combination.

- ⊕ Robust design.
- ⊕ The modular plinth system makes it possible to reduce the number of references in stock.

## Floor

### Possibility of joining plinths

- 1 - The surfaces between corners are always in contact.**  
They are joined by an M8 screw and nut, not included in the standard supply.

- + Longitudinally free space for passing cables.
- + Greater rigidity of the resultant assembly unit.

- 2 - By side panels, the M6 screws and caged nuts, not included in the standard supply, reference **NSYSPM6** and reference **NSYCN9M625**, which can be mounted above and/or below.**

- + Improves rigidity in the depthwise direction during transport.

- 3 - Vertical plinth assembly** by means of M12 screws and nuts, not included in the standard supply.

- + The two heights of corners can be combined.

### Possibility of fixing the enclosure to the plinth

- 1 - Fixing from the inside of the enclosure by means of an M12 screw, screwing directly into the corner of the plinth.**

- + Fixing convenience and speed.

- 2 - Fixing from the outside of the enclosure with a M12 screw, screwing directly onto the vertical upright.**

- + Maximum rigidity of the enclosure-plinth assembly.

### Floor

#### Possibility of fixing the plinth to the floor

**1** - Fixing from the inside of the enclosure.

The machining angle varies according to the plinth model:  
 Plinth height 100 mm  $\alpha = 18^\circ$ .  
 Plinth height 200 mm  $\alpha = 9^\circ$ .

**2** - Fixing from the outside of the enclosure, optimum point for the rigidity of the assembly.

The machining angle varies according to the plinth model:  
 Plinth height 100 mm  $\alpha = 22^\circ$ .  
 Plinth height 200 mm  $\alpha = 11^\circ$ .

**3** - It is also possible to use floor-fixing supports, reference **NSYSGF**, to fix the corner or the panel and the corner to the floor.

The corners of the ends can be rotated in the event of needing to remove the side panels of the plinth and/or to obtain access to the fixing outside the floor, when the set is installed against the wall.

#### Fixing the enclosure to the plinth

Fixing from the inside of the enclosure by means of an M12 screw, screwing directly into the corner of the plinth.

⊕ Fixing convenience and speed.

#### Fixing the enclosure to the ground

Fixing from the outside of the enclosure, optimum point for the rigidity of the assembly.

The machining angle varies according to the plinth model:  
 Plinth height 100 mm  $\alpha = 22^\circ$ .  
 Plinth height 200 mm  $\alpha = 11^\circ$ .

#### Enclosure against a wall

Thanks to the design of the corners, when the enclosure is installed against the wall, the following is possible:

- to remove the side panels (turning back corners),
- to access the external fixing to the floor.

It is also possible to use floor-fixing supports, reference **NSYSGF**, to fix the corner or the panel and the corner to the floor.

#### Assembly of the plinth panels

The panels are fixed with an M6 screw to the corner, included in the standard supply of the side panels.  
 The front and rear panels are delivered mounted on the corners.

### Examples of solutions

PB502564-72

PB502565-51

PB502566-43

#### Plinth cross rail fixed in position B

- They are fixed to the plinth cross rails, both the universal and the quick-fixing types.
- Their depth is adjustable with a pitch of 25 mm.
- See universal and quick-fixing cross rail references, page 232.

*Plinth cross rail fixes in position B. It requires 2 cross rails in position A to be fixed.*

|                 | For plates with 1 or 2 cable entries. The cables can have different diameters. | Brush-type gasket for installation on the cable-gland plates. The cables can have different diameters. | Spare gasket, made from self-extinguishing expanded polyurethane with a cross-section of 15 x 25 mm, for fixing on cable-gland plates.                                       |
|                 |                                                                                |                                                                                                        | Sealing gasket, made from ethylene-propylene with a cross-section of 3 x 10 mm, for mounting on the perimeter of the cable-gland plates. Adhesive to guarantee good sealing. |

|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
|                 | Provides excellent protection against splashes from rainwater. Highly recommended for outdoor applications. Not compatible with the simultaneous use of lifting elements. Spacial SF: it is possible to use a single canopy with combinations of modular enclosures (example of a 1600 mm canopy with two coupled 800-mm enclosures). | Roof providing natural ventilation for the enclosure, with IP30 protection. Height: an extra 63 mm in relation to the structure. |
| Material        | Galvanised steel                                                                                                                                                                                                                                                                                                                      | Steel                                                                                                                            |

**FL21 cable-entry membranes (1)**

Membrane plate for watertight cable entries made from insulating material (fireresistance level UL94-V0).  
 Direct installation in the FL21 cable-entry plate adapter.  
 4 models: plain plate and membrane plates from 7 to 35 cable entries.

- **Material:** grey plastic.
- **Ingress protection rating:** IP65.
- **Supply:** membrane plate and fixing elements.

### Locking system

| Characteristics | Handle for shape inserts and cylindrical barrels |
|-----------------|--------------------------------------------------|
|-----------------|--------------------------------------------------|

Easy to change the opening direction of the door, right/left.  
Space reserved for enclosure identification, 21 x 27 mm, protected by a label frame.

|                              |                                                           |
|------------------------------|-----------------------------------------------------------|
| Material                     | Handle: polyamide 6 with 30 % fibreglass, RAL 9005 colour |
| Mechanical protection rating | IK10                                                      |
| Fire resistance              | 650°C                                                     |
| Supply                       | Standard handle and fixing elements (insert not included) |

# Stainless-steel wall-mounting enclosures

## Introduction

PE501229.eps

### What is stainless steel?

#### How is the stainless steel grade determined?

These enclosures have been specially designed for the chemical, oil and food and beverage industries, among others, which are particularly demanding in terms of hygiene and resistance to corrosion.

#### Thanks to an elaborate composition

■ The following table shows the percentages of the main alloy elements that make up stainless steels. The resistance of the material to aggressive agents in the environment depends mainly on these alloys.

| Stainless-steel type |           | Chemical composition (%) |          |         |            |
|----------------------|-----------|--------------------------|----------|---------|------------|
| AISI grade           | N. Europe | Carbon                   | Chromium | Nickel  | Molybdenum |
| 304L                 | 1.4307    | < 0.03                   | 17 - 19  | 8 - 10  | 0          |
| 316L                 | 1.4404    | < 0.03                   | 17 - 19  | 10 - 13 | 2 - 2.25   |

PE501230

### Choosing a stainless steel grade

#### AISI 304L stainless steel

##### (known as food and beverage stainless steel)

The most commonly used type in the food and beverage industry for its resistance to corrosion and easy cleaning.

- Prevention against corrosion, especially in the presence of organic acids.
- Resistance to the action of nitrous gas in the presence of condensation water and in most aggressive environments.

PE501231

#### AISI 316L stainless steel (known as marine stainless steel)

Recommended in salty or chlorinated environments due to its very high resistance to corrosion thanks to the presence of molybdenum.

- Improved resistance to corrosion.
- Particularly well adapted to environments charged with acidity, bromine and saline halides or which use very corrosive additives and solvents.

## Introduction

### The finish

#### The finish: 3 solutions against aggressive environmental agents

Surface condition plays an important role in the fight against bacteria.

The lower the roughness, the fewer bacteria become incrustated.

Reduced roughness means fewer bacteria, less adherence of materials and an impeccable finish.

To choose a finish is also to choose an appearance of the enclosures that matches the environment of other machines and equipment.

#### > Solution 1: Scotch-Brite® brushing

The method used consists of brushing as defined by the ASTM (American Society for Testing and Material).

- Finish very commonly used for the chemical and food and beverage industries.
- Surface roughness is improved thanks to an additional polishing process which offers more efficient characteristics against polluting elements.
- Surface roughness,  $Ra \leq 0.8 \mu m$ .

#### > Solution 2: Micro-beading (on request)

Exclusiveness, an impeccable finish with smooth silky appearance.

The method:

- Bombardment with miniscule ceramic balls of the entire surface to be treated at very high speed.
- Closes micro-cracks caused during lamination by flattening.

The result:

- Increased hardness.
- Reduced surface roughness ( $Ra \approx 0.8 \mu m$ ).
- A perfectly even surface, with a silky appearance (no scratches and no burrs).
- Reduces the adherence of materials.
- Allows disinfection.

Typical application: pharmaceutical and food and beverage industries.

#### > Solution 3: Protective painting (on request)

The highest protection against aggressions, external pollution and projections of metal particles.

- Provides the ultimate protection against corrosion.

Typical applications: marine, seaside, off-shore.

# Stainless-steel wall-mounting enclosures

## Introduction

➤ These enclosures have been specially designed for the chemical, oil and food and beverage industries, among others, which are particularly demanding in terms of hygiene and resistance to corrosion.

PB500075-75

PB501225-31

### Finishes

- Two types of steel offered as standard: 304L and 316L, with Scotch-Brite® brushed finish.
- Painted or micro-beaded finish (on request).

PB501239

### Large range of accessories

- Stainless-steel accessories: canopy, wall-fixing lugs.
- Accessories of the standard offer: mounting plate, inner door, modular chassis and step slides.
- Large selection of locks with 100 % stainless-steel transformation.

PB501240-60

### Sealing

- Protection rating of IP66 (1 door) or IP55 (2 doors) according to IEC 60529: complete protection against dust and water sprays.
- Polyurethane gasket.
- Gutter-shaped front profile.
- Three closure points for the double door.

PB501241

### Robustness and durability

- Resistance to external mechanical impacts:
  - IK10: plain door,
  - IK08: glazed door.
- Door reinforcement frame or profile.
- Stainless-steel hinges.

PB501242-45

### Convenience and time saving

- 304 or 316L stainless-steel wall-fixing lugs.
- Vertical reinforcement perforated profiles, which make it easier to equip the door.
- Reversible door opening to 120°.
- Easy installation directly on the machine thanks to the 4 rear drill holes.

This range can be configured according to your needs

- NSYPIN inner door fixed directly to the enclosure.
- NSYPIN inner door fixed to the adjustable NSYSDCR support. In this case, both the inner door and the mounting plate may be depth adjustable.

\* Equipped with welded vertical profiles in order to facilitate cable management.

### Material and finishes

#### Stainless-steel grade:

- AISI 304L and 316L as standard (Spacial SMX).
- AISI 316L (on request) (Spacial SFX).

#### Finishes:

- Scotch-Brite® brushed (standard).
- Micro-beaded (on request).
- Painted (on request).

### Convenience and time saving

- Complete range of accessories for installation, cable management, etc.
- 316L stainless-steel plinth: easy cable entry (Spacial SMX).
- 304L or 316L stainless-steel plinth: easy cable entry (Spacial SFX).
- Reversible door opening to 120°.
- Padlock lock with key or form insert.
- Adjustment rails perforated with a pitch of 25 mm.
- Perforated reinforcement frame allowing accessories to be mounted on the door.

### Sealing

- Protection rating of IP55 (IEC 60529): complete protection against dust and water sprays.
- 3-point closures.
- Canopy (optional):
  - protects the sealing plane of the door,
  - guarantees correct water drainage,
  - no stagnation on the top.
- Single-piece cable-gland plate with polyurethane gasket.

### Compatible with the other ranges

- The mounting plates and other accessories of the Spacial SM and SF standards metal offers.

### Hygiene

- The high quality of the standard finish enables very easy maintenance while avoiding contamination.
- The hygienic feet made from 316L stainless-steel, adjustable between 140 mm and 200 mm height, make it easier to clean under the enclosures.

### Robustness and durability

- Resistance to external mechanical impacts: IK10 according to IEC 62262.
- 3 hinges made entirely from stainless-steel.
- Door reinforcement frame.

### Resistance to corrosion

- High resistance to corrosion. 304L and 316L stainless-steels provide the best solutions for applications in extremely demanding environments.

This range can be configured according to your needs

**New** Early 2016, the PLS range changes color

**RAL 7032**

PB501325-20    PB500213-20

➔

**RAL 7035**

PB501325SE-20    PB502791-20

**> Why change?**  
To harmonize the Schneider Electric Universal enclosures offer. Answer to customer requests and to the the market trends.

**> What happen with the part numbers (references)?**  
Every product that have changed in colour have also changed the part umber. It is done just adding a letter "G" at the end on reference. *Example:*

| RAL 7032 | RAL 7035  |
|----------|-----------|
| NSYPLM43 | NSYPLM43G |

**> How can I obtain RAL 7032 enclosures?**  
Consult us.

**> Will the new RAL 7035 colour offer the same properties as RAL 7032?**  
Yes, all mechanical properties will be the same. The light reflexion is even improved.

**> Insulating industrial boxes:**

- ABS for conventional applications (IK07) with the usual constraints,
- polycarbonate for enhanced impact resistance (IK08) and for outdoor applications or applications directly exposed to UV,
- polycarbonate certified UL,
- IP55 rating for all ranges,
- Protection against electrical impacts Class II.

PB500248E55

PB500271-32

**Easy to install**

3 methods of fixing the box to its support.

PB500273-72

**Easy to use**

Only one tool is required: a flat screwdriver.

PB500091

**Smart**

Fixing studs on the cover.

**This range can be configured according to your needs**

**4 different services available:**

Assemble to order

Mounting of standard accessories

Painting

Machining

(1) Ref. **XALEK1702** houses an emergency switching off palm button with mechanical locking according to standards IEC 60364-5-53 and 60947-5-5.

### Button description

- Emergency switching off function with a red, Ø 40 mm, "turn to unlock" palm button.
- Start / Stop function with 2 push buttons.
- Up / Down / Stop function with 3 push buttons.
- Technical features of the switches:
  - "NC" switch with positive opening manoeuvre according to IEC 60947-5-1 appendix K,
  - mechanical durability of the emergency switch: 0.1 million cycles,
  - mechanical durability of the "NC" and "NO" switches: 5 million cycles,
  - protection against short circuits: 10 A.

### Spare Parts

#### Accessories bag

**Reference**  
NSYTBPASBS

> **PLS boxes:** polyester rear and PC transparent cover with hinges and wing screws for manual opening.

### Modular

The dimensions of the sides, multiples of 9 cm, allow the creation of assemblies.

### Protection

- IP65.
- Gasket between body and cover.
- IK09.
- Insulation Class II.

### Easy

Bosses with inserts, at the rear of the body, for fixing plates or various supports.

**This range can be configured according to your needs**

4 different services available:

Assemble to order

Mounting of standard accessories

Painting

Machining

## Examples of assembly

All the boxes can be joined by their lateral surfaces, using the coupling frames **NSYUM...** or **NSYUCC...**, and the joining and fixing pieces **NSYPS2C27** and **NSYPS4C27**.

## [!] Drill holes

Side cut-out press, ref. **NSYPUC27**.

- The machining operations on the dimensions of the lateral plates or frames can be specifically produced in our factory.
- The surfaces can be identified by the numbers provided on page 160.

Dimensions here represented are approximate.  
Template to machine the box provided with the product.

### Associated applicative offers **332**

#### PHD Polyester Heavy Duty enclosures

**New** Early 2016, the PLM range changes color

**RAL 7032**

➔

**RAL 7035**

**> Why change?**  
To harmonize the Schneider Electric Universal enclosures offer. Answer to customer requests and to the the market trends.

**> What happen with the part numbers (references)?**  
Every product that have changed in colour have also changed the part umber. It is done just adding a letter "G" at the end on reference. *Example:*

| RAL 7032 | RAL 7035  |
|----------|-----------|
| NSYPLM43 | NSYPLM43G |

**> How can I obtain RAL 7032 enclosures?**  
Consult us.

**> Will the new RAL 7035 colour offer the same properties as RAL 7032?**  
Yes, all mechanical properties will be the same. The light reflexion is even improved.

# Insulating wall-mounting enclosures

## Introduction

### > Monobloc wall-mounting enclosure

- made from polyester reinforced with fibreglass, moulded by hot compression.
- Degree of protection IP66,
- Impact resistance IK10 for the plain doors and surfaces and IK08 for the glazed doors of the polyester versions,
- UL certification and NEMA classification 4x and 13 for the polyester wall-mounting enclosures,
- Total insulation to produce class II units,
- Complies with RoHS and REACH Directives

P1237102-32

#### Service life

High resistance to corrosion in harsh environments, maintaining its mechanical properties and insulation.

PB501327-40

#### Easy

- Door easily reversible by turning it over.
- Opening to 120° or 180°.
- Easy machining with no corrosion.
- Lightness.
- Polyamide hinge pin, easily removable and captive.

PB501325-95

#### Smart

- Notches for easy fixing of DIN rails.
- Grid pattern on the rear of the door for marking the machining operations.

PB501325-60

This range can be configured according to your needs

|                 | The lateral sides of the plinths are provided with bosses for attaching cross-rails with cut-out profiles, for supporting cables. The reference of the cross-rail includes all the elements required for assembly.                                                                            | Makes it possible to obtain IP54 for the plinth and the plinth-enclosure coupling. | Allows the partially buried installation of plinths before completion of the floor. The plinths are attached by four feet with a standard length of 750 mm. Possibility of horizontal adjustment of the plinth. The reference includes a kit made up of four feet and fixings. |          |                 |          |                 |          |                 |                                                                                                                                |           |                |                                                                                                                                 |           |                 |

# Insulating wall-mounting enclosures

## Specific accessories

### Locking system

#### Characteristics

#### Locks and inserts for enclosures with H ≤ 847 mm

- The ABS/PC 310 x 215 mm enclosure is supplied with a lock with a double-bar insert as standard.
- The 308 x 255 mm enclosure is supplied with two locks with a double-bar insert as standard.
- The polyester enclosures from 430 to 847 mm high are delivered as standard with:
  - 2 locks with double-bar insert, ref. **NSYCDBPLM**,
  - or a 3-point closure with handle and lock with key 1242 E (enclosures **NSYPLM●●V**).
- Double-bar insert ref. **NSYTDBCRN**, is placed in a rectangular escutcheon.
- A plastic key, ref. **NSYDBP**, enabling the opening of the double-bar insert, is included in the standard supply. This key can be fixed to the double-bar system to remain on the enclosure and be used as a handle.

#### Options

- NSYTC6CRN
- NSYTC7CRN
- NSYTC8CRN
- NSYTT6CRN
- NSYTT8CRN
- NSYTL405PLM
- NSYTL220PLM
- NSYTHL1242EPLM
- NSYTHL405PLM
- NSYTHL421PLM
- NSYTHL455PLM
- NSYTHL2331APLM
- NSYTHL2433APLM
- NSYTHL3113APLM
- NSYTHPLM

#### Options to transform the locks with double-bar inserts

Changing the shape inserts for locks with keys according to the following table.

Replacement for locking handle with cylindrical barrel, delivered with all the parts required to change the lock.

#### Options to transform versions NSYPLM●●V, with retractable handle and 3-point closure

Transformation of the standard insert (barrel for key 1242E, ref. **NSYTL1242EME**) for other shape inserts or barrels according to the following table.

| Name                      | References         |
|---------------------------|--------------------|
| 5 mm double bar           | <b>NSYTDB5ME</b>   |
| 6 mm male square          | <b>NSYTC6ME</b>    |
| 7 mm male square          | <b>NSYTC7ME</b>    |
| 8 mm male square          | <b>NSYTC8ME</b>    |
| 6.5 mm male triangle      | <b>NSYTT6ME</b>    |
| 8 mm male triangle        | <b>NSYTT8ME</b>    |
| Barrel and key 405        | <b>NSYTCL405ME</b> |
| Reinforced key and barrel | <b>NSYTLRME</b>    |
| JIS key and barrel        | <b>NSYTLJISME</b>  |
| Manual                    | <b>NSYTMME</b>     |

### Locking system

#### Locks and inserts for enclosures NSYPLM108/T

- Enclosures delivered as standard with 5 mm double-bar insert.
- Insert ref. **NSYTDB5PL**, placed in a long rectangular escutcheon, activates a 4-point closure system.

#### Options to transform the insert

The standard insert can be replaced with other shape inserts, according to the following table.

| Name                 | References      |
|----------------------|-----------------|
| 6 mm male square     | <b>NSYTC6PL</b> |
| 7 mm male square     | <b>NSYTC7PL</b> |
| 8 mm male square     | <b>NSYTC8PL</b> |
| 6.5 mm male triangle | <b>NSYTT6PL</b> |
| 7 mm male triangle   | <b>NSYTT7PL</b> |
| 8 mm male triangle   | <b>NSYTT8PL</b> |

#### Options to transform for a retractable handle

The escutcheon and rosette assembly can be replaced with a lock with retractable handle equipped with inserts or barrels, according to the following table.

|                                  |       | Kit allowing depth adjustment with a pitch of 12.5 mm, and the fixings required for the installation. Incompatible with the modular distribution chassis. |     |                   | They slide directly into the notches, with a pitch of 25 mm, which are located on the rear of the enclosures, except enclosure ref. <b>NSYPLM3025/T</b> . They allow direct fixing of symmetrical DIN rails by self-tapping screws. Option of raising the rails with an M6 spacer using a plastic nut containing an M6 nut. |                    | They are fixed to the rear of the enclosure without uprights, with a pitch of 25 mm for the notches on the rear of the enclosure, with the help of direct-fixing nuts ref. <b>NSYTCSPML</b> or <b>NSYTCSM6PLM</b> . |                    |
| Material                         |       | Galvanised steel                                                                                                                                          |     |                   | -                                                                                                                                                                                                                                                                                                                           |                    | Treated steel                                                                                                                                                                                                       |                    |

**New** Early 2016, the PLA and PLD ranges change color

RAL 7032

PB501325-20    PB500213-20

➔

RAL 7035

PB501325SE-20    PB502791-20

**> Why change?**  
To harmonize the Schneider Electric Universal enclosures offer. Answer to customer requests and to the the market trends.

**> What happen with the part numbers (references)?**  
Every product that have changed in colour have also changed the part number. It is done just adding a letter "G" at the end on reference. *Example:*

|          |           |
|----------|-----------|
| RAL 7032 | RAL 7035  |
| NSYPLM43 | NSYPLM43G |

**> How can I obtain RAL 7032 enclosures?**  
Consult us.

**> Will the new RAL 7035 colour offer the same properties as RAL 7032?**  
Yes, all mechanical properties will be the same. The light reflexion is even improved.

**New dimensions**  
 2000 mm height  
 620 mm depth

# Polyester floor-standing enclosures

## Introduction

> The **floor-standing enclosures** are made from **polyester reinforced with fibreglass**, moulded by hot compression. High resistance to corrosion in harsh environments, it maintains its mechanical and insulation properties.

### Bigger dimensions

The new options with **2000 mm** height end **620 mm** depth have been created to feet industry and infrastructure demands for motor control, power distribution, electronics or telecom applications.

#### PLAT version

##### Ventilation

Open top part with canopy allowing for ventilation.

##### Easy

Various bosses for M8 inserts.

#### PLAZ version

##### Open bottom

Big open bottom to be mounted directly on the floor or on a plinth.

##### Smart

Plain mounting plate installed on step slides and compulsory adapter plates in all the enclosures with open bottom part.

#### PLAZT version

##### Easy

Door opening to 180°.

##### Resistant

Anti-lever security system.

**This range can be configured according to your needs**

4 different services available:

Assemble to order

Mounting of standard accessories

Painting

Machining

# Polyester floor-standing enclosures

## Dimensions

### PLAZ

### Enclosure with plinth-type open bottom part

### PLAZT

### Enclosure with ventilated canopy and plinth-type open bottom part

### Common top views

- (1) 4 bosses with M8 inserts and studs for direct fixing of mounting plates.
- (2) Bosses designed to accommodate M8 inserts, ref. **NSYTEX8**. They are placed:
  - On the back of the enclosure, from the height of 1000 mm. They allow the fixing of partial mounting plates and assorted equipment.
  - On the top and bottom parts of the enclosure. They are used for fixing the step slides, an internal door, 19" chassis, etc.
- (3) Dimensions for fixing on the floor or on a plinth.
- (4) Entry dimensions, door open.
- (5) Dimension of 28 mm for enclosures with heights of more than 1000 mm (height after the installation of the plain mounting plates with reinforcement foldings).
- (6) With a width of 1250 mm in standard supply, 500-mm door on the left and 750-mm door on the right.

DB300633-60

Trim frames      Coupling frames

DB300634-27

\* Not valid for coupling 2 enclosures using ZZ or ZH type plinth.

### [!] Enhanced depth enclosure

- After industrial machining, the frames of the standard enclosures are coupled in the factory to obtain enhanced depth floor-standing enclosures.
- The internal volume of the standard enclosures remains unaffected.
- Possible for the 4 enclosure versions, in particular for 19" applications with widths of 750 and 1250 mm.
- IP44 in the version with ventilated canopy, IP54 for the other versions.
- A rear door can be installed in the coupled enclosures.
- Option of installing 2 sets of step slides (at the front and at the rear).
- Supply or installation in the enclosures of a 19" chassis with side trim plate installed on the step slides:
  - 19 U, height 1000 mm,
  - 23 U, height 1250 mm,
  - 25 U, height 1500 mm.

## Specific accessories

PLAZ PLAZT

### Base accessories

#### Characteristics

#### ZZ plinths (1)

- The frontal parts (front and rear) are removed from the inside. Removing them makes it easier to install the cables.
- The 500-mm plinth can be partially buried.
- It is provided with one or two reinforcement cross-rails, adjustable to adapt to the position of the cables.

\* Plate with reversible dimensions; it can be installed in enclosures with inverted dimensions.

Example: Plate ref. NSYMM64 can be used for the following enclosures: H 600 x W 400 mm or H 400 x W 600 mm.

For plain and silkscreened mounting plates: In wall-mounting enclosures with widths of 1000 and 1200 mm, it is possible to install 2 mounting plates at different depths using an additional central step slide NSYSRSDCR (more information on page 218).

## Step slides for wall-mounting enclosures

S3D

S3X

| Characteristics | Step slides for mounting plate                                                                                                                                                                      | Step slides for 2 mounting plates in one enclosure                                                                                                                                                                                                                  | Slide bracket for 2 mounting plates at different depths                                                                                     |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
|                 | Set of 4 supports intended for installation in enclosures with depths of 200, 250, 300 and 400 mm. The rail allows the depth of the plate and other accessories to be adjusted in steps of 12.5 mm. | In 1000 and 1200 mm wall-mounting enclosures, it is possible to install 2 mounting plates side by side, using the additional central step slides.                                                                                                                   | Additional slide bracket to be installed on the central step slides in order to mount 2 mounting plates, side by side, in different depths. |
| Supply          | 4 step slides                                                                                                                                                                                       | 2 step slides                                                                                                                                                                                                                                                       | 2 slide brackets                                                                                                                            |

### Brass nuts to fix the upright to the enclosures

Supply: 4.  
Reference: **NSYAMCSF**

### Slides and brackets

They allow the depth of the plates and rails to be adjusted.  
Supply: 10 units. References per unit. To be ordered in multiples of 10 (10, 20, 30, etc.).

| Type                                                                   | References |
