Screw technology terminal blocks

BP502173

Terminal block type **NSYTRV**

Presentation

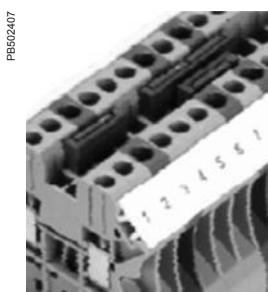

NSYTRV screw technology terminal blocks are components that are well established throughout the world and are suitable for the vast majority of connection applications, due to their wide range of functions and connection possibilities.
NSYTRV terminal blocks ensure quality, safety and the operational availability of equipment. In addition to these advantages, they optimise the setting up and operation of installations, due to their simplicity and integrated functions.

Material properties

All metal parts of the screw terminal blocks (screw, cage and bar) are made of high grade, non corrosive copper alloys. This eliminates the risk of rusting and associated consequences, such as unreliable electrical contacts and/or jammed screws.
The good electrical conductivity insures a low temperature rise.
The surface of the metal parts is protected by a lead free, galvanic nickel or tin plating.
The insulating housings of the **NSYTRV** terminal blocks are made of halogen free and UV resistant Polyamide 6.6. This type of plastic has a high impact strength and is flexible even at low temperatures.
Further advantages are the good tropical and termite resistance, high chemical resistance and the excellent aging characteristics. Polyamide 6.6 is certified for inflammability class V0 in accordance with UL 94 and can be used at operating temperatures between -60°C and +130°C.

Principle of screw connection

PB502407

Connection functions

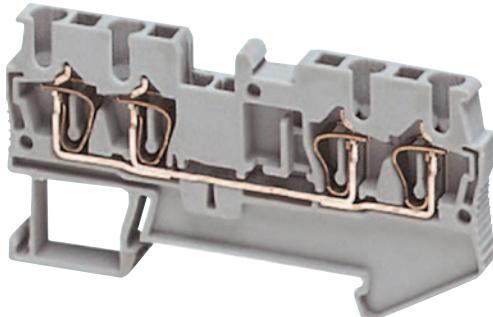

- Passthrough
- Protective earth
- Double deck and Multi-pole
- Blade disconnect type
- Disconnect (removable carrier), for diode, resistor or cylindrical fuse
- Fused disconnect
- Miniature passthrough
- Passthrough with Telequick universal foot
- For neutral conductors
- Lug-lug type
- Lug-clamp type

Mounting accessories

The **NSYTRV** terminal blocks have a uniform range of accessories for all connection technologies. Bridging, labelling and test accessories are standardized and reduce your logistics costs. In addition, all the terminal blocks of the range can be freely combined with each other using the double bridge shaft.

Spring technology terminal blocks

AZ5 and DZ5 cable ends

See pages 86

Presentation

Spring technology is a type of connection that requires no maintenance and ensures the separation of mechanical and electrical functions.

NSYTRR spring terminals significantly reduce wiring time and eliminate the need for regular re-tightening. This technology allows not only the connection of flexible conductors with or without cable ends, but also of solid conductors with a nominal c.s.a. from 0.13 mm^2 to 25 mm^2 .

NSYTRR terminal blocks ensure quality, safety and the operational availability of equipment. In addition to these advantages, they optimise the setting up and operation of installations, due to their simplicity and integrated functions.

Material properties

All metal parts of the spring-cage terminal blocks are made of non corrosive materials. The current carrying metals are high grade copper alloys.

The good electrical conductivity insures a low temperature rise.

The contact force for the spring-cage connection is applied by a spring element made of high strength chromium-nickel spring steel. The surface of the metal parts is protected by a lead free, galvanic nickel or tin plating.

The insulating housings of the **NSYTRR** terminal blocks are made of halogen free and UV resistant Polyamide 6.6 certified for inflammability class V0 in accordance with UL 94. They can be used at operating temperatures between -60°C and $+130^\circ\text{C}$.

Connection functions

Spring technology terminal blocks are simple and fast to install. A flat screwdriver is used to open the connection point, allowing the conductor to be inserted into the cage.

As soon as the screwdriver is pulled out, the contact is automatically made by spring pressure. The contact force, which is independent to the user, creates a shakeproof and steadfast long-term connection.

- Passthrough
- Protective earth
- Double deck and Multi-pole
- Blade disconnect type
- Disconnect (removable carrier), for diode, resistor or cylindrical fuse
- Miniature passthrough

Mounting accessories

The **NSYTR** terminal blocks have a uniform range of accessories for all connection technologies. Bridging, labelling and test accessories are standardized and reduce your logistics costs.

In addition, all the terminal blocks of the range can be freely combined with each other using the double bridge shaft.

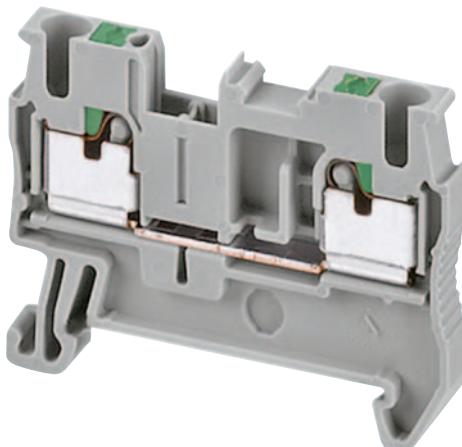

For better contact between the conductor and the current bar, use a cable end (ferrule) for all stranded or flexible wires.

50%
faster installation

Push-in technology terminal blocks

PBS02082

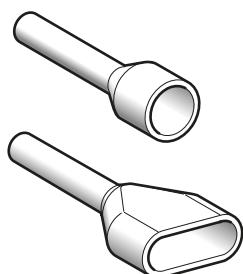

Terminal block type **NSYTRP**

PBS02409

Principle of push-in
connection

PBS02362

AZ5 and DZ5 cable ends

See pages 86

Presentation

The new **NSYTRP** push-in terminal blocks use the most cost effective connection technique on the market. This technique drastically reduces wiring time and eliminates the need for regular re-tightening.

The insertion force of the **NSYTRP** push-in terminal blocks is up to 50% lower*.

This allows easy and direct insertion of solid conductors or flexible conductors with cable ends (ferrules) from 0.34 mm² to 6 mm².

Material properties

All metal parts of the push-in terminal blocks are made of non corrosive materials.

The current carrying metals are high grade copper alloys.

The good electrical conductivity insures a low temperature rise.

The contact force for the push-in connection is applied by a leg spring made of high strength chromium-nickel spring steel.

The insulating housings of the **NSYTRP** terminal blocks are made of halogen free and UV resistant Polyamide 6.6 certified for inflammability class V0 in accordance with UL 94. They can be used at operating temperatures between -60°C and +130°C.

Connection functions

The push-in terminal blocks are made for direct conductor connection. This means that solid conductors or conductors with cable ends can be directly inserted into the terminal block without tools.

The special spring contour allows easy insertion of conductors from 0.34 mm² to 6mm² c.s.a. Smaller cross-section conductors can be connected by actuating the green button before insertion for 0.14mm² and up.

The contact force, which is independent to the user, creates a shakeproof and steadfast long-term connection.

- Passthrough
- Protective earth
- Double deck and Multi-pole
- Blade disconnect type
- Disconnect (removable carrier), for diode, resistor or cylindrical fuse

Mounting accessories

The **NSYTR** terminal blocks have a uniform range of accessories for all connection technologies. Bridging, labelling and test accessories are standardized and reduce your logistics costs.

In addition, all the terminal blocks of the range can be freely combined with each other using the double bridge shaft.

For better contact between the conductor and the current bar, use a cable end (ferrule) for all stranded or flexible wires.

*50% lower if compared with other direct insertion terminal blocks from the market.

Screw technology terminal blocks

PB502410

PB502411

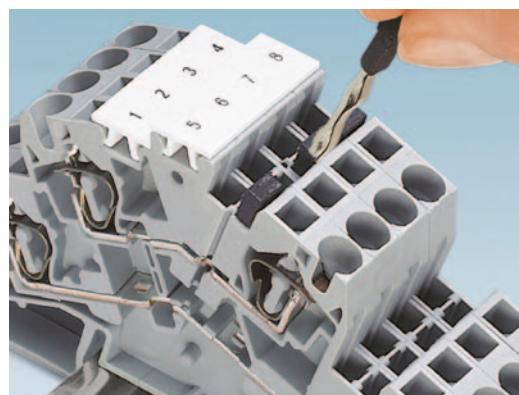

Snap-on PE foot

Earth terminal blocks are simply snapped onto the DIN rail to make contact. This mechanically and electrically efficient connection meets all the requirements of standard IEC 60947-7-2.

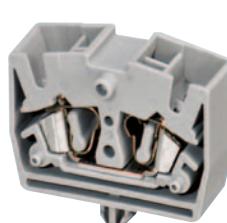

Flexible plug-in bridge system

The NSYTRAL^{*} plug-in bridges allow potential distribution to be implemented quickly. All terminals have two bridge shafts to make flexible chain bridging, step bridging or bridging between non adjacent terminal blocks possible. The reducing bridge permits simple connection of terminal blocks with different nominal cross-sections, (e.g. an NSYTRV102 terminal with an NSYTRV22 terminal). This way the power distribution terminal blocks can be quickly setup.

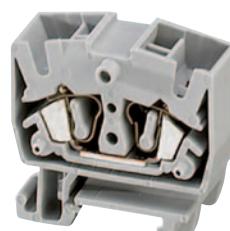

PB502354

PB502213

PB502215

PB502214

Vertical bridge

The NSYTRALV24R vertical bridge offers the option of connecting both levels of the standard double level NSYTRR24D and NSYTRR44D terminal blocks.

Miniature terminal blocks with maximum usage

Due to its space saving design, mini spring-cage terminal blocks are ideal for wiring in extremely restricted spaces. The generous connection space enables fast wiring of stranded and solid conductors. They can be mounted on NS 15 DIN rail or directly mounted using screw flange or engagement pins.

General characteristics Terminal blocks

| | Technology | Spring | Screw | Push-in |

Central power feed

Single-sided power feed

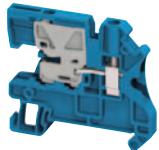

Reducing bridges enable the simple connection of standard terminal blocks of the Linergy TR range to different nominal cross-sections and connection technologies. Power feeds with large cross-sections can be easily distributed among several smaller output terminal blocks. The connection technologies and the connected cross-sections must be taken into consideration when selecting a suitable reducing bridge. The appropriate reducing bridge and the maximum permissible bridge current for a single-sided and central power feed can be determined using the adjacent table.

Reduction bridging with NSYTRR spring or NSYTRP push-in terminal blocks

Snap-on PE foot

Earth terminal blocks are simply snapped onto the DIN rail to make contact. This mechanically and electrically efficient connection meets all the requirements of standard IEC 60947-7-2.

Flexible plug-in bridge system

The **NSYTRAL*** plug-in bridges allow potential distribution to be implemented quickly. All terminals have two bridge shafts to make flexible chain bridging, step bridging or bridging between nonadjacent terminal blocks possible. The reducing bridge permits simple connection of terminal blocks with different nominal cross-sections, (e.g. an **NSYTRV102** terminal connected to an **NSYTRV22** terminal. This way the power distribution terminal blocks can be quickly setup.

(1) If the fuse is faulty, the downstream circuit is not off load.

(2) The current is determined by the fuse used, the voltage by the light indicator. Observe max. power dissipation.

PB502357

All NSYTRV●●NE disconnect terminal blocks have a screwless disconnect slide. When this is levered over with a standard screwdriver, the contact fork slides onto the busbar. The slide engages in the end positions to provide additional protection against accidental actuation.

The shape of the NSYTRV●●NE disconnect terminal blocks is the same as for the screw terminal blocks NSYTRV.

Miniature terminal blocks with maximum usage

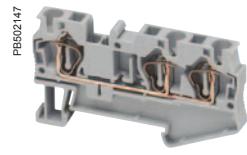

Due to its space saving design, mini spring-cage terminal blocks are ideal for wiring in extremely restricted spaces. The generous connection space enables fast wiring of both stranded and solid conductors. They can be mounted on NS 15 DIN rail or directly mounted using screw flange or engagement pins.

Presentation

The cable end consists of a tinned copper tube, at the end of which is a moulded, insulating bezel.

The copper tube encases the strands of the flexible conductor and makes it easier to insert it into terminals.

The plastic bezel insulates the conductor from adjacent connections.
In addition, certain models allow marking of the conductors.

General characteristics

Copper tube tinned by electrolysis according to ISO 1337.

Halogen-free plastic insulating bezel.

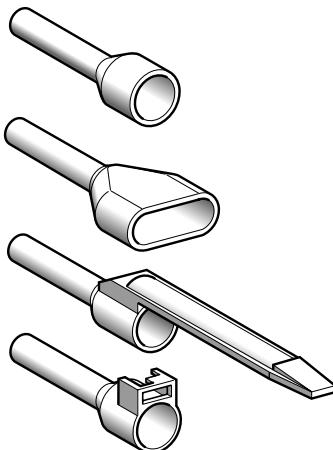

Temperature withstand - 20 °C to 105 °C.

Conforming to standards NFC 63-023 or DIN 46228.

UL and cCSAus certifications for certain products.

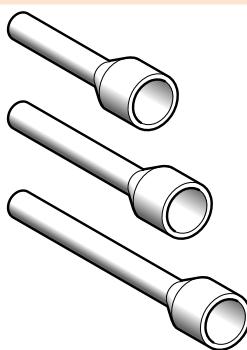

Presentation of the range

4 types

- Single conductor cable ends with insulating bezel
- Twin conductor cable ends with insulating bezel
- Single conductor cable ends with "markable" insulating bezel
- Single conductor cable ends with insulating bezel for fitting clip-on marker tags

3 lengths

- Short: 11 mm, for printed circuit board type mini-connector
- Medium: 13 mm, for industrial applications, connector or screw clamp
- Long: 16.8 mm, for plug-in and spring terminal block applications

4 types of packaging

- Dispenser pack: c.s.a. $\geq 2.5 \text{ mm}^2$
- String of 10 detachable bags: c.s.a. $\leq 4 \text{ mm}^2$
- Individual bag: c.s.a. $\geq 6 \text{ mm}^2$
- Bag containing 10 strips of 50 cable ends

2 standards

- Products conforming to standard NF C 63-023
- Products conforming to standard DIN 46228 Part 4

4 types of packaging

3 types of bulk pack

- **Strings of 10 detachable bags** c.s.a. 0.25 mm² to 4 mm² inclusive.
- **Individual bags containing 20 or 100 products** c.s.a. 6 mm² to 50 mm².
- **Dispenser containing 200, 100 or 50 products**
 - c.s.a. 0.5 to 2.5 mm² (single conductor cable ends),
 - c.s.a. 2 x 0.7 to 2 x 2.5 mm² (twin conductors cable ends).

The dispensers are supplied in packs. Each pack contains 5 dispensers.

This type of packaging for cable ends improves working conditions through more rational use:

- it facilitates storage by avoiding mixing up cable ends of different cross sectional areas,
- it immediately identifies the c.s.a. of the cable ends it contains because it is the same colour as these cable ends,
- it is designed for controlled dispensing **A** and automatic storage **C**,
- the cable ends can be easily picked up from the dish-shaped receptacle **B**.

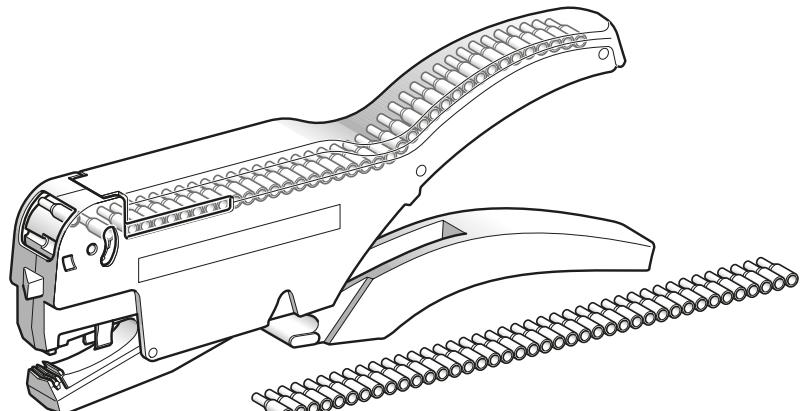

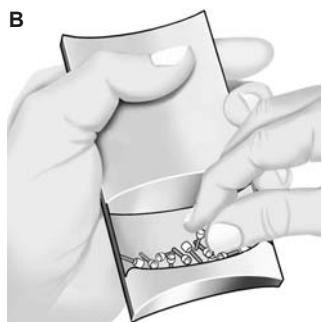

By simply pressing the sides, the dispenser releases the required quantity of cable ends into the receptacle, where they can be picked up, as required.
Releasing the pressure on the sides stops the flow of cable ends.

The colour of the dispenser pack corresponds to the colour coding of the Schneider Electric cable ends.

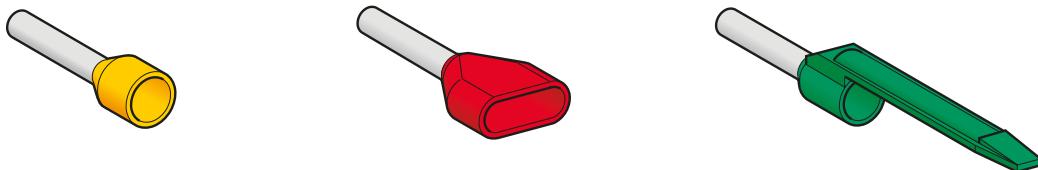

The cable end c.s.a. can therefore be selected visually and instantly.

Strips of 50 cable ends, packed in bags of 10 strips

- C.s.a. from 0.5 to 2.5 mm².
- Allows automatic feeding and crimping of cable ends, using crimping tool AT1TRIF01.

Accessories for fitting markers

| Description | Application | Reference | Weight kg |
|--|--|-----------|-----------|
| Marker holder | Comprises 10 empty compartments which can each hold 100 AR1 MA01 or AR1 MB01 markers | AT1PS1 | 0.300 |
| Tool for quick positioning of AR1 M●01 markers | On cable end tags | AT1PA1 | 0.010 |

(1) UL certified products.

(2) For rapid clip-on mounting of up to 7 markers AR1M●●●.

(3) Complete the reference by adding the number indicating the colour required:

| Number | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 0 |
|---------------|-------|-------|--------|--------|-------|-------|--------|-------|-------|-------|
| Marker colour | Brown | Red | Orange | Yellow | Green | Blue | Violet | Grey | White | Black |
| Number colour | White | Black | Black | Black | Black | Black | Black | Black | Black | White |

(4) Each lot also comprises 400 earth markers (200 green and 200 yellow), 200 + symbols, 200 – symbols and 1 marker positioning tool.

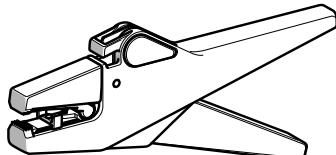

(5) A to Z (200 of each).

(6) Complete the reference by replacing the dot with the required letter. Each lot includes a card of 200 yellow markers with black letters.

(7) 0 to 9 (200 of each).

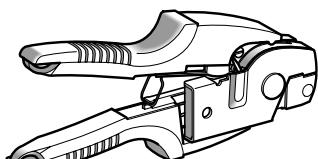

(8) Complete the reference by replacing the dot with the required number. Each lot includes a card of 200 yellow markers with black numbers.
