

QUALITY, HEALTH, SAFETY and ENVIRONMENT TOOLS

VD believes that innovation and success go hand in hand and with this belief, we have internally developed the "Paperless Integrated Management System" application where full Management System Documentation was made available on an electronic platform.

To demonstrate our commitment to provide safe working environment and to protect our employees from occupational injuries and illnesses, VD established the HSE Handbook which is being distributed to all new employees during Induction Training. This small book will serve as a guide for basic HSE points as well as useful contacts in case of emergency.
